The content of this blog is for informational purposes only. I am not a qualified broker, investor, accountant, tax lawyer, financial planner or professional adviser of any kind. Nor am I in any way affiliated with any sort of product or service selling or marketing group. I am nothing more than a person who wishes to share some information with you. So, as with anything of this nature, please do your own research and consult a qualified professional before making any financial investment decisions.

I could be wrong but...

What I am going to talk about in this blog will include my personal opinions and interpretations of historic and recent events as well some of my own speculation about the future. This is the reason for the question mark at the end of the above heading. Do your own research and take the following for whatever you feel this information is worth.

Back in the early 90's the U.S. went to war with Iraq. We called it, "*Desert Storm.*" Prior to that war, Iraq was a world super-power - at least in the sense of its wealth and natural resources. Their currency is called the

"Dinar." From 1982 until about 1993, 1 Dinar was worth about \$3.22 USD. Their only competitor was Kuwait as the highest valued currency on the planet. After Desert Storm, the U.N. imposed sanctions on Iraq and the value of their currency began to plummet. By the time we went back into Iraq in 2003 (under pretense of finding weapons of mass destruction), the value of their currency had plummeted to about 3,000 Dinar to one U.S. dollar! It became completely worthless!^[1] But what happened after that is nothing short of extraorDinary.

Before I go any further, I feel it is necessary to point out that the Rothschild family has played a key role in the banking history of this planet, going back at least as far as the 1700's. I recently came across a web site that I believe totally lays out the Illuminati's game plan concerning the manipulation of money central banks. It is a very lengthy web site with a lot of information, so I am not going to go through it all here. If you are interested in learning more, click on the following link:

No One Can Understand What Has Happened To The Planet Without Watching This Video:

The following two hour and twenty-six minute documentary is excellent and I promise, your time will be EXTREMELY WELL SPENT! I firmly believe this video by [Leonard Ulrich](#) needs to be watched and widely distributed by people who care about life; who long for liberty; who desire freedom from tyranny and who want to break the chains that enslave the entire human race.

NWO: Secret Societies and Biblical Prophecy Vol. 1
 "TO THE THIRD AND FOURTH GENERATION" (NUMBERS 14:18):

Toward the end of the above web page, the author states:

"Ancient Babylon, I mean Iraq, is now one of six nations left in the world who don't have a Rothschild controlled central bank. This war is mainly about stealing Iraq's water supply for Israel and is being fought with the blood of the American military which the State of Rothschild, I mean Israel control."

My personal opinion is that it is not about water. It's not even about oil. It's about building the completed New World Order. I believe it is about **Raising Babylon... in 2012.**

In 2003, when the U.S. invaded Iraq for the second time, the Elite immediately went to work on a "plan" that would eventually change the world.

Before Iraq's economy can even begin to recover from the war, its banking system must be rebuilt.

- By Gordon Platt

The ruins in Baghdad of the Central Bank of Iraq, its marble-clad walls collapsed, are symbolic of the condition of the entire Iraqi banking sector. A majority of the country's banks were bombed, torched and looted during the war. Six months after the United States declared an end to major combat operations, only a few banks are open for business.

Late in 2002, even before war in Iraq was certain, high-level US treasury officials began drawing up plans for financial reconstruction. They knew that reopening the banks after the fall of Saddam Hussein's regime would be essential to get the country running again.

*They were right. And **the widespread devastation left economic planners with a clean slate on which to design a new banking and financial system.** What has emerged is a radical proposal to transform a centrally planned economy based on Eastern European communism into a free-market model for the Arab world.*

***The occupation government of Iraq has decreed a sweeping liberalization that would privatize most state run industries except oil and gas, roll out the red carpet for foreign investors and put much of the banking system in foreign hands.** It is a plan that many analysts and economists say is bound to fail in a country that lacks basic institutions and laws vital to the functioning of a free-market economy. [emphasis mine]*

While at that time, Gordon Platt stated that "many analysts and economists say [the plan] is bound to fail..." you have to take into account who it was that was getting involved. [The following is from a November 2003 CBS MoneyWatch.com news report:](#)

*Meanwhile, the CPA (US-led Coalition Provisional Authority) named a **13-bank consortium led by JP Morgan Chase to operate the newly created Trade Bank of Iraq**, which will support Iraqi imports of equipment and commodities funded through the Development Fund for Iraq. The CPA-administered fund receives most of the proceeds from Iraqi oil exports. JP Morgan Chase was selected over five competitors, including groups led by Bank of America, Bank One, Citigroup and Wachovia, as well as UK-based HSBC, which applied as a single bank.*

J.P. Morgan Chase Bank went in and headed up a 13 bank consortium to establish the new "Trade Bank of Iraq" but really it was the new [Central Bank of Iraq](#) (CBI). They immediately got rid of the old Saddam Dinars and created brand new currency using [De La Rue](#). The new (completely worthless) currency was printed with the MOST high-tech anti-counterfeit measures of any currency on the planet!

You have to ask yourself, "Why is the most worthless currency in the world, also one of the most anti-counterfeit protected in the world?"

Up until December of 2008, you could actually buy the New Iraqi Dinar (NID) from Chase banks as a normal currency exchange. You could literally walk in and exchange USD for IQD (NID) just like you would any other world currency. This was a bit unusual because Iraq for all intents and purposes was no longer a player on the world market due to the still imposed U.N. sanctions (and the fact that their currency was worthless). Incidentally, Chase got the IQD from Bank of America (which is another story altogether that I won't get into here).

As I stated above, before the first Iraq war, the Iraqi Dinar was one of the highest valued currencies on the planet - at one time worth about [\\$4.86 to 1 Dinar](#) (in 1932). After the second Iraq war started, their currency plummeted to about **3,000 Dinar to 1 US dollar** (USD)! But watch this! Enter JP Morgan Chase and associates and the value of the Dinar steadily began to increase in value from about 3,000 to 1 to now about 1170 to 1 where it has sat for over a year now. Below is a screen capture of a chart that I pulled today from [Yahoo Finance](#) that shows how the Dinar has appreciated in value over the past 5 years:

It is a little confusing when you first look at this chart because I used the word "appreciated" and yet you see the graph falling. What you are looking at is the value of the Dinar as compared to the U.S. Dollar. The Yahoo Finance web site only allows you to go back 5 years. But still, you can see that in August of 2006, the Dinar was worth about 1,500 to 1 USD. In 2009, it leveled off at roughly 1,170 to 1. As of this writing, you can see that it has crept down (up in value) to 1,163 to 1. So, even left to grow on it's own it has appreciated steadily in value since 2003. This has been largely due to our efforts in helping to stabilize the country of Iraq. And it is STILL appreciating in value.

Pay attention to what this means. **While the rest of the world's currencies are *plummeting*, Iraq's is just quietly *growing in value*** - almost in the background and completely un-noticed by the public at large (primarily due to mainstream media skewing our view of what is really happening over there). But every now and then the press will do a piece like those in this playlist:

So, there are those "in the know" and every now and then the average Joe might catch videos like these on the news. Sure, there are a lot of web sites out there ([like this one](#)) calling this whole thing a scam and telling people to stay away. You can do your own research and decide for yourself. I've done mine and I am fully convinced this is a "good deal."

I do find it funny though that some of the guys in those videos kept saying they didn't know where to get the Dinar and that "it's very hard to buy this stuff" and such. I find that quite ridiculous. Here is a good video (by one on-line seller) that helps to explain this all a little more:

As you can see, it is easy to buy Dinar on-line. I have not used [DinarBanker.com](#), so I can not personally vouch for them. I have however done business with [DinarTrade.com](#) and have referred many people to them as well, so I do trust them.

Again, as stated in the disclaimer at the top of this blog, I am not licensed nor am I in any way qualified to give financial advise. So, why am I telling you all of this? I'm telling you this because I care about you and I believe

that in these troubled times, this is an incredible opportunity that can be taken advantage of for very little money. Is it a risk? Of course it is! The Middle East is constantly in turmoil. But as my dad says, "Never invest more than you're willing to lose." I could spend \$100 taking my family to the movies - so why not skip the movie and take a little "risk" right?

To be honest with you, I didn't get involved with any of this because of all the information I read on financial web sites. I didn't even get involved because of what I saw in the current political news. I got involved because of what I saw in prophecy concerning the rise of Babylon. Check out this interview between Glenn Beck and Joel Rosenberg and consider what the Bible has to say about Iraq in the Last Days.

I don't agree with Joel's take on America in the Last Days ([because of my theories concerning our role in actually bringing about the Anti-Christ's rise to power](#)), but I do agree with what he has to say about Iraq's emergence as an economic super-center. And I don't think it is just a coincidence that after the Third Horse of the Apocalypse rides, the statement is made:

*And I heard what seemed to be a voice from the midst of the four living creatures, saying, A quart of wheat for a **denarius**, and three quarts of barley for a **denarius**; but do not harm the oil and the wine!*

- Revelation 6:6 (Amplified Bible)
[**emphasis** mine]

Wikipedia has this to say about Dinars:

The Dinar is the name of the official currency in several countries. The Gold Dinar was a coin dating back to the early days of Islam, issued by many rulers, and the Islamic gold Dinar is to this day still used as a coin or unit of account, separate from the currencies listed below. Many claim that the name of the Gold Dinar was derived from denarius, a Roman currency whose name meant "ten times" (as it was originally worth 10 asses), but it is unknown whether this is the true derivation.

Regardless of whether or not a Dinar truly is derived from the Roman currency known as a "denarius," I do find the similarity a little too hard to ignore, especially when I consider Babylon's role in the Last Days. I will elaborate more on this shortly.

For now, here's the deal concerning this "window of opportunity" that I'm presenting to you: Iraq's current situation is similar to that of Japan and Germany after World War II. Countries have had their currencies devalued because of war before. Then, once everything gets back on track and the country rebuilds and rejoins the Global Community, their currency will "revalue" (RV) or in some cases it may be "re-instated" (RI) to its pre-war value. So, what does that mean with regard to the Iraqi Dinar?

Remember at the end of the [last blog](#), I told you that Iraq had finally announced its new government. What I didn't tell you was that [the U.N. also released the sanctions that were imposed on them](#).

The council lifted sanctions that have been in place since Hussein's 1990 invasion of Kuwait. Iraq will now be able to pursue a civilian nuclear program and take control of its oil and natural gas revenue on June 30, 2011. The council also terminated all remaining activities of the controversial oil-for-food program which ran from 1996-2003 and helped ordinary Iraqis cope with sanctions.

Curiously, this happened exactly two years to the day from the date Chase stopped selling Dinar over the counter (Dec. 15, 2008).[\[2\]](#)

What this means is they are now able to join the Global Community again. But you can't play in the Global Market unless you have a viable, tradeable currency! That means Iraq *has* to RV or RI its currency to a level that is comparable to the World Market! So, now all the speculators are freaking out, expecting Iraq to either RV or RI in the very near future. What does that mean for the investor?

The idea here is that the value of the Iraqi Dinar could quickly RV to at least a 1 to 1 ratio - although many believe it could go as high as it was before the invasion of Kuwait, which would mean it could RI at a 3 to 1 ratio (or even higher). Essentially, you buy it now while it's still cheap, then when it raises in value, you go to the bank and exchange it for U.S. currency. And yes, once it is a on the Global Market as a tradeable currency, you will be able to exchange anywhere currency normally is exchanged - which includes most major banks.

So, for example, [you can purchase 500,000 Dinar for about \\$640.00](#) (including shipping, handling and C.O.D. charges). If the Dinar RVs at a 1 to 1 ratio, your small investment just turned into \$500,000 virtually overnight. If it goes back to it's old value at let's say roughly a 3 to 1 ratio, your \$640 investment just turned into more than \$1.5 million! Not a bad deal. I'd like to see any other investment pay off that big - that fast.

Now that I've got your attention: If this is the first time you have ever heard anything about the Iraqi Dinar and you think it is something you might invest in, and IF it pans out the way I just described, would you please prayerfully consider tithing or contributing *at least a portion* of your tremendous gain into our ministry? I am not asking this to give you any kind of guilt trip and there's really no way I could track this anyway, but I am asking for help to produce [SEED, the series](#) - the episodic sci-fi show God has laid on our heart to create. We can't do it alone. We estimate each episode will cost about \$1 million to produce. We have 72 episodes outlined and 3 scripts ready to produce right now. But we're lacking the funds to go into production. So, if you've been blessed by the information I have labored to bring to you, and if you believe in [what we're trying to do with media to reach the world](#), would you please consider returning the blessing and commit to using at least some of your new wealth to help us accomplish our work for the Kingdom?

I have spent a lot of time researching and putting this [series of blogs](#) together and I receive regular updates on the status of the Dinar. If you'd like to be added to our Dinar e-mail database, please fill out the form below.

OK. Now for what I call *The Omega Plan?* Again, this is just a theory, so keep an open mind and work with me on this.

We've already seen how the U.S. went into Iraq under false pretenses. As I stated in the [first three blogs](#), I believe there is a totally different reason why we are there. At any rate, the fact is JP Morgan Chase went in and helped set up a *central bank*. That means, the Illuminati now has a vested interest in making sure Iraq succeeds. And so far it has. Their country is being rebuilt and their currency is growing stronger. "Smart" investors are highly encouraged to invest and speculators have been going crazy because Iraq is now poised to become a world super power again... almost over night.

Meanwhile, as all of that was going on, the US economy had a (planned) crash. Our economy continues to crash and I believe it will ultimately tank in the very near future. The same could be said for most major world economies. So, what's going on?

Back in July of 2010, President Obama talked about downsizing our military forces in Iraq. By the time 2010 drew to a close, in early December, the UN had finally released Iraq from the sanctions that had been put on them. That effectively put them back on the World Market as a viable player once again. All that was left was for the newly formed government to be announced. And that happened on December 21, 2010 - [the same day the moon turned blood red and floated over the shoulders of Orion, or shall we say, Babylon's founder, King Nimrod!](#) Is that a coincidence? I don't think so.

Iraq also recently announced their [2011 Budget](#) which can NOT be sustained at 1163 to 1.[3]

*"Iraq Central Bank said that **the current budget for year 2011 is the biggest in Iraq history...**"*
[emphasis mine]

In order for all they have planned to occur, the nation must have a tradable currency. Therefore, all the speculation is that they will revalue (RV) and some even suggest a re-instatement (RI) back to it's former value before the sanctions. And that is not unreasonable considering the country certainly can sustain that value with its natural resources, just as it did back before the sanctions were imposed. Iraq does after all have one of the largest oil reserves on the planet just sitting there under its soil waiting for global consumption. Unlike our country that has a fiat money system, their currency can actually be backed by something of value!

This incredible event literally has the potential to "reset" the global economy! Think about the implications of that. And if little ol' speculators like you and me stand to reap a good return from investing in Iraqi Dinars, just imagine how rich the Rothschilds and Rockefellers are going to be - considering they likely own BILLIONS of Dollars worth of Dinars. You know they do. As does the U.S. Treasury and the treasuries of other countries as well. And they would have "bought" them when it was over 2,000 to 1. So if Iraq RVs at a 1 to 1, that's a staggering amount of money! BUT remember, Iraq's currency used to be worth more than \$3.22 to 1 Dinar. If they RI at a pre-1990 rate, forget it. They've just made the biggest ROI of all time!!! They will absolutely OWN THE WORLD! Which has always been their goal.

Since World War II, the USD has been the world's (dominant) Reserve Currency. That was planned. And so was the crash that started here in America. When America fell, the world fell. But wait! We helped to both crush Iraq and then rebuild her - or should I say the bankers did. Now, when the Iraqi currency "bails out" the world economy, do you think the world will want to stay on the USD as its Reserve Currency? No way! China and Russia have already made moves to get off of it.

The U.S. put the world in the economic state it's in right now. Therefore, I believe there's no way the world is going to trust America in the future. And since the Iraqi Dinar will have helped to save the world economy, it is in the perfect position to be raised up as the new Reserve Currency. To me, this makes sense not just for economic reasons, but also for prophetic reasons as well.

How far away are we from finding out if any of this theory is true? Not far at all in my opinion. Speculation concerning the Iraqi Dinar has been rising to a fever pitch since December 21st. So much so that the CBI's web site went off-line during the last week of December due to a server crash. Now, those who have purchased IQD's at a substantial discount wait patiently to see how wealthy they are going to become virtually over night.

In war, when an army drops a bomb and civilians get hurt, they call it "Collateral Damage." As stated above, I believe the Elite are WELL stocked in IQD. The rich will become substantially richer. Those of us who have a few hundred (or even thousand) dollars worth of Dinar stashed away will be nothing more than "Collateral Beneficiaries" of the greatest economic super plan in history. But I believe said beneficiaries will only have a short window of time to benefit from this financial miracle. Why? Because the Elite don't want rich people. They want poor people who are easier to herd and control. They also want billions of DEAD people, so they certainly don't have our best interest in mind.

"LET THESE BE GUIDESTONES TO AN AGE OF REASON"
the message of the Georgia Guide stones

1. Maintain humanity under 500,000,000 in perpetual balance with nature.

Notice the first "new commandment" etched in stone? In order to maintain humanity under 500 million, that means more than 6 BILLION have to die! So having that in mind, I believe wisdom and discernment is needed - especially for those in the Body of Christ who will benefit from this financially.

Scripture says that "the wealth of the wicked is stored up for the righteous."^[4] Many people have interpreted that in many different ways, but consider this. The Scriptures testify that the parents of Jesus were poor. They could only afford the poor man's offering of two pigeons for sacrifice.^[5] But Jesus was destined to do great things. So, what happened? You have to go back in time over 500 years to see what God had in mind to solve that problem.

The prophet Daniel served three kings in Babylon. [In that time he amassed tremendous wealth and became a great teacher of "Sacred Astronomy."](#)

Many believe that the "magi" who came from the east, were in fact Jews who came out of Daniel's school of astronomy. This would seem to make sense. First, they knew the stars well and thus were able to discern the signs they were seeing around the time of Jesus' birth. Second, why else would the wealthy elite of a foreign country want to travel such a distance to pay tribute and honor to the baby king of another nation? It makes perfect sense that the magi were well educated, well trained and wealthy men of *Jewish* descent. They knew both astronomy AND the prophecies of Hebrew scripture. So what happened? **Tremendous wealth was brought out of Babylon** and delivered to Jesus. The riches helped to finance His future ministry, just as the herbs and spices were prepared for His future death.

We have a similar situation with the Jews leaving Egypt in the Exodus. They had a mission to go and inhabit the Holy Land that would become known as Israel. They brought the wealth of Egypt with them when they did.[\[6\]](#)

So, could it be that we will soon see a repeat of history? Most of the people that I know who own Dinar are Believers in Jesus Christ. And there are a lot of them. Will the wealth of the (wicked) east (Babylon) be brought to the Body of Christ (again) to enable us to accomplish our work in these Last Days? I believe so.

Babylon was where the first "World Order" without God was attempted under Nimrod. [Will the first be the last?](#) The Bible talks about it rising again. President Bush Sr. was obsessed with the idea - especially after the first Iraq desert party was "over." After Desert Storm, it seems like *everyone* was talking about a New World Order and the need to embrace it. A lot has happened since then, and a lot more still has to happen. But ultimately, it is my strong belief that the NWO's headquarters will be located in Babylon. So, how will it happen?

I believe we are seeing the "Omega Plan" falling into place. In summary, the following is a timeline for what I believe has happened and what will happen to usher in Babylon's rise to power once again.

- On September 11, 1990, President George Bush (Sr.) announced his plan for a New World Order.

- In 1999, Zahi Hawass discovered the Tomb of Osiris.
- September 11, 2001 - eleven years (to the day!) from the time Daddy Bush announced his plans for a New World Order (that will succeed), a terrible event rocked the United States. And what do you know? Junior Bush just so happened to be in office to push the NWO plan through. For reasons I will not get into here, I believe that event was [completely planned and orchestrated from within](#). Soon after the events of 9/11, the Patriot Act was passed and our Bill of Rights began to be stripped away from us. Little by little our Constitution began to be shredded and tossed out the window. Cameras started popping up on every street corner. Our phones, e-mails and pretty much every area of our life became monitored. And we gave away more and more of our freedoms all in the name of "security." Today, "Big Brother" is all around you. The stage has been set for a New World Order and things are falling nicely into place for a one world government to be formed.

- In April of 2003, archeologist digging in Iraq claimed to have found the Tomb of Gilgamesh. A month later, the U.S. moved into Iraq under pretense of finding "weapons of mass destruction." As everyone now knows, we did not find weapons. But I do believe we found A weapon of mass destruction. We found Nimrod himself! And in case there are any doubts, consider the fact that one of the first things our troops did when they entered Iraq was raid the museum of Baghdad. What? That's right. [We plundered a MUSEUM!](#)

The museum was the victim of a carefully planned assault. The thieves who took the most valuable material came prepared with equipment to lift the heaviest objects, which the staff could not move from the galleries, and had keys to the vaults where the most valuable items were stored. Not since the Nazis systematically stripped the museums of Europe has such a crime been committed.

What did they take? That is up for speculation at this point because it is classified. But one web site brings up this juicy tidbit of information:

On June 7, 2003, U.S. authorities announced that world famous treasures of [Nimrud](#) were recovered from a secret vault in Iraq's Central Bank. [remember who was in

charge of the whole central bank?] *The artifacts included necklaces, plates, gold earrings, finger and toe rings, bowls and flasks. Officials said that of the 170,000 items initially believed missing, just 3,000 remained unaccounted for. And, of those, 47 were main exhibition artifacts.* [7]

[emphasis mine]

Notice how the trivial things like plates and earrings were "discovered" and returned. Oh, aren't the Americans great!? How nice and noble of them to seek out and return those "national treasures" to Iraq. But what about the **3,000 unaccounted for items**?

All we know is cuneiform tablets were a hot commodity. My personal theory is they were looking for anything and everything to do with the "portal technology" that was the Tower of Babel - especially considering that some of the items stolen were from the "world famous treasures of Nimrud." These "blueprints" could prove incredibly useful - especially now that they had the guy who built it!

On one of his [on-line blogs](#), Tom Horn adds some further intrigue to this whole scenario (especially considering what I wrote about in the [first blog](#)):

*Isaiah... says, "open the gates, ye ruler," ...whoever this ruler is, he opens "gates" in Iraq/Babylon through which end-times giants (gibborim) return to the surface of earth as agents of God's wrath. Noting that Isaiah ties the destruction of Iraq/Babylon with the reappearance of gibborim in this way, we recall how **thousands of U.S. troops, on invading Iraq during the Bush administration, admittedly filled U.S. containers with archaeological materials, including what some have speculated to be cuneiform tablets pointing to the location of pure-blooded Nephilim buried in underground caves.***[8] *This is exactly where Enoch said the dead antediluvian Nephilim are, and raises fascinating questions: Would agencies like Darpa have interest in studying or cloning the extinct beings if they were, or have been, found? Could man in his arrogance revive ancient dna, revitalizing or blending it with other living organisms in a way similar to what the Watchers did in making the first Nephilim? Is the factual reappearance on earth of such legendary beings verified by Isaiah, who also foresaw transhuman creatures such as satyrs (transgenic half-men, half-goats) accompanying the return of giants in the end times, or why other apocryphal books like 2 Esdras 5:8 prophesy the birth of "monsters" for the same period of time?*

Some may be shocked to learn that in addition to the citations above, the Bible actually describes an ultimate end-times spiritual warfare between the "mythological gods" and Christ. "The Lord will be terrible unto them: for he will famish all the gods of the earth" says Zephaniah 2:11. "The Lord of hosts, the God of Israel, saith; 'Behold, I will punish the...gods'" (Jeremiah 46:25). [emphasis mine]

- As noted above, also in 2003, J.P. Morgan Chase Bank went in and set up the Central Bank of Iraq. They created a new currency that was completely worthless, but yet had some of the most high-tech anti-counterfeit measures of any other currency on the planet. The governments and Elite of the world purchased billions of Dollars worth of Dinar at a 2,000 (or 3,000?) to 1 USD ratio. Then, they began the process of appreciating the value to it's current rate of 1,163 to 1 USD. Already, they are in a position for a healthy return. But with a RV they have made trillions. With an RI, they've made trillions and trillions more!
- In 2008, plans were set in motion to collapse the current World Reserve Currency, the U.S. Dollar. The U.S. economy finally collapsed in 2010 and with it so did the economies of the world. This perfectly sets the stage for a New World Currency... that will ultimately serve the New World Order.
- On December 21st, 2010, on the birthday of Nimrod, his nation was "born again" out of the ashes like a Phoenix. A blood red moon floated above Orion's shoulders like a decapitated head above his heavenly body, to herald this event ([at 3:22 in the morning](#) no less - remember, one Iraqi Dinar *used to be* valued at \$3.22!). These are all significant signs. And the earth shook in response!

As you can see from the above timeline, the stage is now set to literally "reset" the global economy... in one day. And it all appears to be tied to the numbers 322.

- As noted in [Seventy-Two And A Red Moon Rising](#), the numbers 322 are directly tied to the Skull and Bones Secret Society of which both Bush Sr and Jr were a part of - the two presidents who were both in office at the time of Iraq's downfall... and rebuilding. Both are responsible for ushering in the New World Order as a result.
- Also noted in that blog, the numbers 322 represent the time of the blood red moon Lunar Eclipse floating over Orion-Gilgamesh-Osiris-Nimrod at 3:22AM over Washington DC just as Iraq was announcing its newly formed government.
- And now of course as we've seen here in this blog, there's the previous value of the Iraqi Dinar at \$3.22 to 1 USD. A value many speculators believe will be what the Dinar will RI back to when Iraq is finally a player on the World Market once again.
- Also of interest: [March 22 \(3/22\) is the date the Georgia Guidestones were erected.](#)
- [Click here are some other interesting things to check out](#) regarding the date 3/22.

Is this all of that just a coincidence? I don't think so! All I can say is I am thankful for **Deuteronomy 3:22**:

Ye shall not fear them: for the LORD your God he shall fight for you.

A New World Economy, and a New World Order are primed and ready for a New World Leader to emerge. Could that leader be Nimrod? [I believe it will be.](#) I believe a lot will happen between now and December 21st, 2012 that will rapidly put all things into motion to bring about the rebirth of Nimrod as the king of the world - the Anti-Christ.

Remember what Jesus said in Matthew 24:24-28?

*"For there shall arise false Christs, and false prophets, and shall shew great signs and wonders; insomuch that, if it were possible, they shall deceive the very elect. Behold, I have told you before. (In other words, PAY ATTENTION!) Wherefore if they shall say unto you, Behold, **he is in the desert**; go not forth: behold, he is in the **secret chambers**; believe it not. For as the lightning cometh out of the east, and shineth even unto the west; so shall also the coming of the Son of man be. For wheresoever the **carcase** is, there will the **eagles** be gathered together."*

The "carcase" of Gilgamesh may have been found in the "desert." The "secret chamber" known as the Tomb of Osiris has been found. The United States "eagles" are heavily entrenched and invested in the home town of Nimrod.

A lot of "signs" are pointing to December 21, 2012 as the date of a significant event. Could that be the day the angel opens the "shaft to the bottomless pit" and releases the spirit of Apollyon (aka Apollo) to re-inhabit its former host body? [Is this "resurrection" even possible?](#)

The Illuminati started with Nimrod in Babylon. It has all come full circle for this same nation to rise to global super power status, nearly over night. My prediction is that the IMF will set the IQD up to be the NWO's One World Reserve Currency replacing the Dollar in the very near future... probably after all the dust settles. I believe Nimrod will resurrect on December 21st, 2012 and the world will be astonished at this "Beast" of antiquity rising out of the water encompassed "secret chamber" as the god-king, of which nearly every culture on the planet has a memory. It may be accompanied by a significant "UFO" event. But that's a subject for another blog (coming soon).

As I said at the very beginning of this blog, I could be wrong about all of this. Do your own research. I've done mine and these are the conclusions that I have come to as a result.

Watch and pray. Be ready and look up... so much the more as you see the days approaching!
